Introduction

A Cancer Registry Training Programme was conducted at the District Training Unit, Koraput district, with the objective of strengthening cancer registry activities and improving the knowledge and skills of healthcare personnel involved in cancer data collection and reporting.

The training programme was led by staff members from Tata Memorial Centre with the support of the District Public Health Officer and Assistant Manager NCD. The programme focused on creating awareness regarding the importance of cancer registry, standardized data collection procedures, and quality reporting mechanisms.

At the beginning of the session, all participants were asked to complete a pre-test assessment to evaluate their baseline knowledge regarding cancer registry concepts, reporting procedures, and registry activities. The pre-test helped in assessing the existing understanding of participants and identifying areas requiring further emphasis during the training sessions.

Welcome Address and Commencement of the Session

The Cancer Registry Training Programme commenced with the welcoming of dignitaries and district health authorities to the dais during the inaugural session. The programme marked the beginning of cancer registry activities in Koraput district and aimed to strengthen systematic cancer data collection and reporting within the district.

As a token of appreciation for initiating and supporting cancer registry activities, a trophy was presented to the Acting CDMO & DPHO for his leadership and encouragement towards the programme. Bouquets were also presented to the distinguished officials present during the event, including the DPHO, DPM, ADPHO Disease Control (DC), and the Day Care Chemotherapy Medical Officer, as a gesture of welcome and respect.

Token of Appreciation was presented as a trophy to the CDMO and DPHO of Koraput District

Question and Answer Session and Certificate Distribution

Following the hands-on training exercise, an interactive question-and-answer session was conducted to clarify participants' doubts regarding cancer registry activities, data collection procedures, reporting formats, and practical challenges faced during implementation. The queries raised by the participants were addressed by the Medical Officer of the Day Care Chemotherapy Unit, who provided valuable guidance and practical insights related to cancer registration and patient data management.

The session encouraged active participation and helped improve the understanding of participants regarding the operational aspects of cancer registry activities.
