Introduction

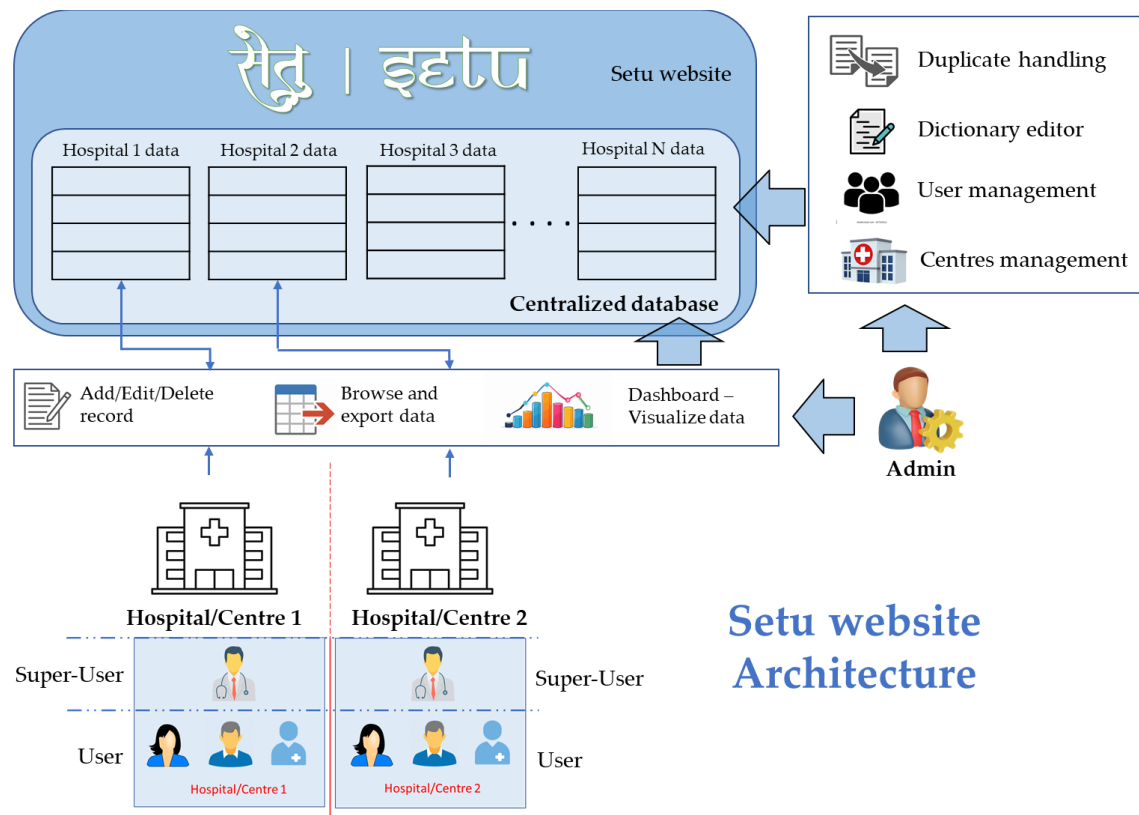

- Odisha State Population-Based Cancer Registry is an initiative by Department of Health and Family Welfare, Government of Odisha.
- Setu website is developed for Odisha State Population-Based Cancer Registry's data management.
- Cancer treating hospitals/PHCs/DHHs and all centres who deals with cancer patients in Odisha State will enter the cancer patient details in Setu website.

Department of
HEALTH & FAMILY WELFARE
Government of Odisha

Setu Architecture

- Patient data entered from a centre/hospital will not be visible to other centre/hospital.

Actions	Only access respective centre data		Access all data

Computer Specification

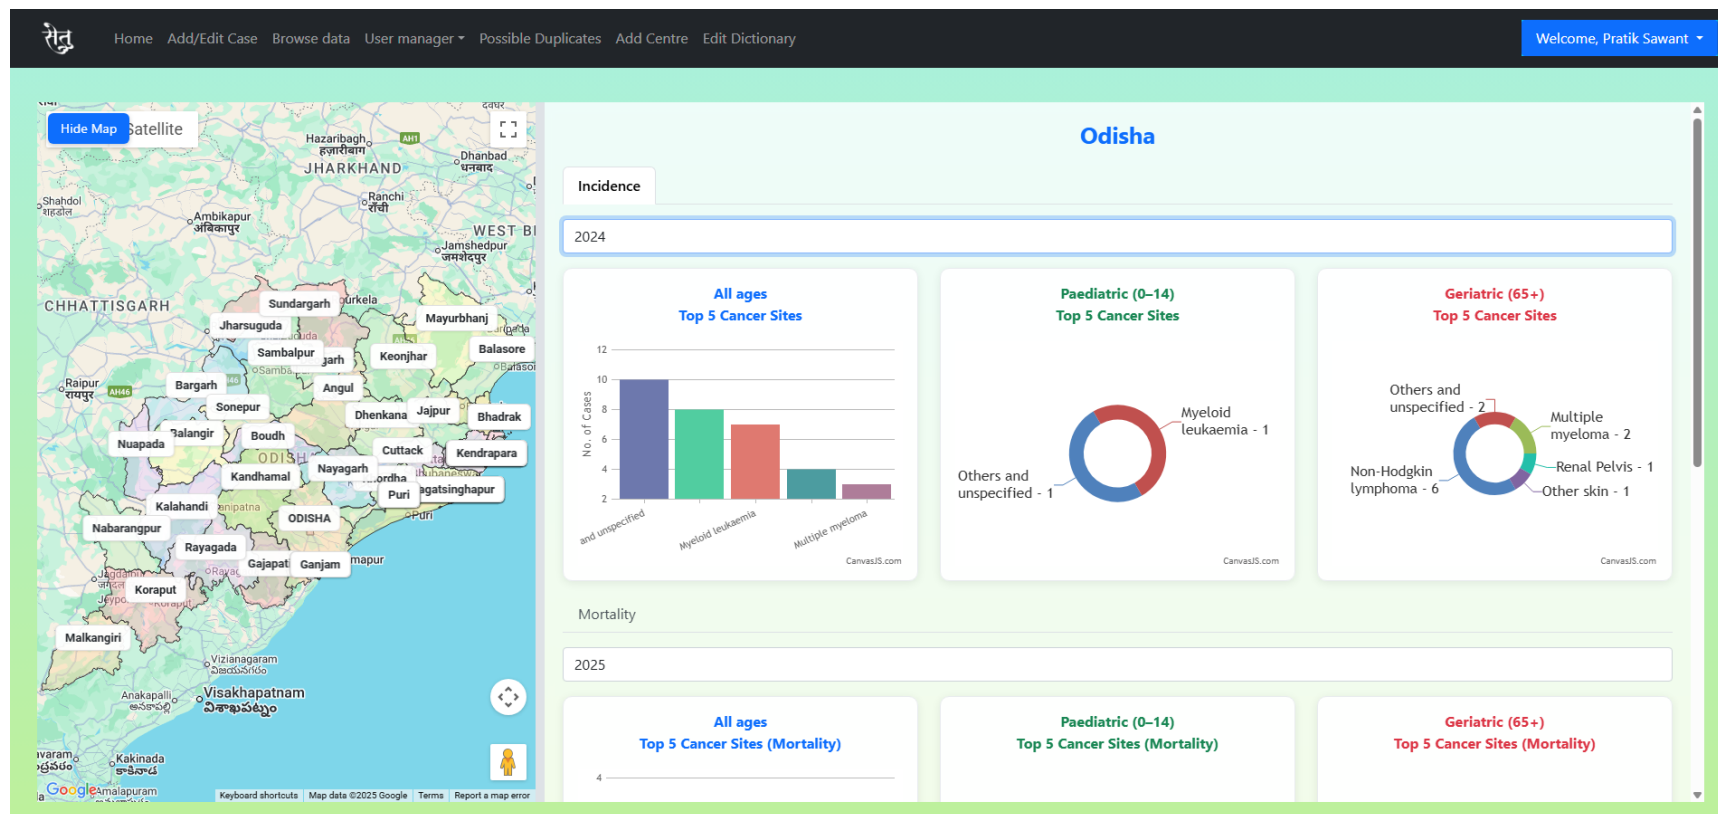

- Desktop computer or laptops are recommended for using Setu website as large screen are best suited for data entry work.
- Following are the recommended specifications for desktop or laptop:
 - Monitor – 22 inches or more
 - CPU – Intel core i3 – 9 generation or higher core latest generation
 - Hard disk – 500 GB or more
 - RAM – 4GB or more
 - OS – Windows 11 (or other relevant)
 - Browser – Google Chrome latest version (or other relevant)
 - Additional software – Microsoft Office (or other relevant)
- Setu website can also be accessed from smartphone and tablet devices.

Data Entry

Data Entry: Introduction

Data Entry: Introduction

1. From the website's menu bar, on top left, click on "Add/Edit Case"
2. Add/Edit record page will be opened. We can add a new record or we can edit the existing record from this page.
3. To add a new record make sure "INSERT NEW" is highlighted in blue, if not the click on it.

The screenshot shows the Setu web application interface. The top navigation bar is dark blue with the Setu logo and links for Home, Add/Edit Case, and Browse data. The 'Add/Edit Case' link is highlighted with a red box. Below this, a secondary navigation bar contains links for Add/Edit Case, Browse data, User manager, Possible Duplicates, Add Centre, and Edit D. The main content area is titled 'PATIENT details section' and features a red box around the 'INSERT NEW' and 'VIEW /EDIT' buttons. Below this, there is a search section with a text input for 'Enter Patient ID' and a 'Search' button. Further down, there are buttons for 'Check for duplicate', 'Delete record', and 'Save record'. The form includes fields for 'Registration Number' (with a placeholder 'Enter RegistrationNumber' and a hint 'Enter the Registration Number.') and 'Name'.

Department of
HEALTH & FAMILY WELFARE
Government of Odisha

Data Entry: Introduction

- The form is divided in three sections
 - Patient
 - Tumour
 - Source
- The structure of this form is similar to CanReg5 software, developed by International Agency for Research in Cancer (IARC), WHO.
- The left section of the form is the Patient section, the basic and demographic details of patient is saved in this section
- Right section is the tumour section where tumour details are saved
- Inside tumour section, at bottom there is Source section where patient's case source details are saved.
- All section details must be filled. Perform checks on the filled data
- If the checks result is successful then confirm the case and then save the record

Department of
HEALTH & FAMILY WELFARE
Government of Odisha

Add Record: Patient section variables

- **“Registration Number”, is a optional field.** If staff has assigned each case a unique number for better internal coordination, then they can enter that number here in this field, if not then keep it blank.
- **“Name” of the patient is a mandatory field** and should be captured carefully, if possible it should be copied from essential documents like Aadhar Card, PAN Card. Salutations (Mr/Mrs/Smt/etc.) are not required.

Registration Number
Enter RegistrationNumber
Enter the Registration Number.
Name
Enter name
Enter the complete name of the cancer patient.

Department of
HEALTH & FAMILY WELFARE
Government of Odisha

Add Record: Patient section variables

- **“Sex” of the patient is a mandatory field.**
- **Contact Number is a mandatory field.**
- **Aadhar Number is a mandatory field.** If not known then enter twelve times 9, i.e., 999999999999
- **Address is a mandatory field.** Do not enter character comma and single quote in address.

Sex
--Select sex--
Contact Number
Enter contact number
Enter the contact number/mobile no. of the cancer patient. Do not enter symbols like + or *
Aadhar Card Number
Enter Aadhar Card Number number
If Aadhar Card Number is not available then enter 12 times 9, i.e, 999999999999
Address
Enter address

Department of
HEALTH & FAMILY WELFARE

Data Entry: Duplicate checking

Check for duplicate **Step 2** Delete record Save record

Enter RegistrationNumber
Enter the Registration Number.

Name
Enter name
Enter the complete name of the cancer patient.

Sex
--Select sex--

Contact Number
Enter contact number
Enter the contact number/mobile no. of the cancer patient. Do not enter symbols like + or *

Aadhar Card Number
Enter Aadhar Card Number number
If Aadhar Card Number is not available then enter 12 times 9, i.e. 999999999999

Address
sfsdfv b vbcv dfpdf

Step 1
Enter Name,
Contact Number,
Aadhar Number,
Address

- For checking duplicates, first enter Name, Contact Number, Aadhar number and Address, then click on button “Check for duplicate”.
- Based on entered information, the website will look for possible duplicates present in database or not, if present then it will be displayed in a pop-up window.
- Below screenshot shows an example of “Check for duplicate” result.

Possible duplicates								
Following are the possible duplicate records for the entered data :								
Patient ID	Name	Age	Sex	National ID Card	State	District	Block	Village

Government of Odisha

Add Record: Patient section variables

- Select State, District, Block and Village accordingly.
- State and District field are mandatory.
- These fields acts as a filter while duplicate checking.
- Select “Area” (Urban/Rural/Tribal) according to the demography of the village.

State
1 - Odisha
Will be used as filter while duplicate checking.
District
122 - Mayurbhanj
Will be used as filter while duplicate checking.
Block
12204 - Baripada
Will be used as filter while duplicate checking.
Village/City
12204027 - Baripada Town Unit No.5 Lalbazar
Will be used as filter while duplicate checking.
Area
1 - Urban

Department of
HEALTH & FAMILY WELFARE
Government of Odisha

Add Record: Patient section variables

- Select Date of Birth, **it is a mandatory field.** Year must be entered if complete date of birth is not known, enter 01st Jan as day and month as default values (YYYY-01-01)
- Select Vital Status of the patient, **it is a mandatory field.**
- If Vital Status is “Dead”, then enter the further details of Date of Death, Age at death and Cause of death. These are optional fields
- Enter Remarks if there are any. It is a optional field.

Enter Date of Birth		
--Select Year--	--Select Month--	--Select Day--
Vital Status		
--Select Vital Status--		
Enter Date of Death		
--Select Year--	--Select Month--	--Select Day--
Age at death		
Enter Age at Death		
Cause of Death		
--Select Cause Of Death--		
Remarks		
Enter Remarks (if any)		

Add Record: Tumour section variables

Enter the “Date of Diagnosis”, based on date of birth and date of diagnosis, “Age at diagnosis” will be automatically calculated.

Enter Date of Diagnosis (Incidence Date)		
--Select Year--	--Select Month--	--Select Day--
Age at Diagnosis		
Enter Age		

Basis Of Diagnosis
7 - Histology of primary tumour
Select the primary site
Site
15 - ESOPHAGUS
Sub-site
155 - C15.5 Lower third of esophagus
Histology
8000 - Cancer
Behaviour
3 - Malignant
ICD10
C155
Generate ICD10 and ICCC Code
ICCC Code
12b

For generating ICD10 and ICCC Code for a tumour, Select information for:

- Basis of Diagnosis,
- Site and Sub-site
- Histology
- Behaviour

Now click on button “Generate ICD10 and ICCC Code”, this will generate the required codes

- All these fields are mandatory.

Department of
HEALTH & FAMILY WELFARE
Government of Odisha

Add Record: Tumour section variables

Following fields are all optional, fill the information as available for the cancer patient.

- Grade Cell Type
- Clinical Stage
- Notes (Clinical notes if available)
- Treatment (Treatment received by the patient)
- Treatment Status

Grade Cell Type
--Select Grade Cell Type--
Clinical Stage
--Select Clinical Stage--
Notes
Enter Notes (if any)
Treatment
--Select Treatment--
Treatment Status
--Select Treatment Status--

Department of
HEALTH & FAMILY WELFARE
Government of Odisha

Add Record: Tumour section variables

- User can upload cancer patient case record photos if available
- User can upload five different photos/PDFs
- If multiple files need to be attached then compress the files in to zip file and then upload the same

Upload Patient Case File Report Images/PDFs of Tumour 1

Browse Data

Browse data

- The entered data can be viewed through “Browse data” page.
- As data is saved in three tables, patient, tumour and source, data can be viewed in following table formats:
 1. Patient
 2. Tumour
 3. Source
 4. Patient + Tumour
 5. Tumour + Source
 6. Patient + Tumour + Source
- We can specify range of values to certain variables.
- Data can be ordered in ascending and descending order as per the selected variable
- Custom filter on variable data can be applied to view the filtered data.
- Requested data is displayed in table format in preview window. Each record in preview table has an option to be opened by clicking “View Record” button.
- The admin and super-user has the option to export the selected data.
- Data entered by respective hospital/centre will be shown, other centre data will not be displayed to another centre.

Browse data

1. Select the table

2. Apply filter/range/sorting if required

3. Click on “Refresh table”

4. Requested data will be displayed here in preview table

5. Click on “View Record” button to open the record.

Detect Possible Duplicates

Detect Possible Duplicates

- This option is available only for admin.
- In this page, the website tries to find possible duplicates by matching each record with complete database, if the records matching percentage is above 75% then a combination of possible duplicate is shown in this page.
- Admin will later open this combination of possible duplicate and will review whether this is an actual duplicate record combination or unique records.
- The duplicate checking is done across all the records of all the centres/hospitals.
- This option enable us to identify the scenario of a patient who visited multiple centre/hospital for treatment and respective centre/hospital entered the data of this patient in the website.

From the menu bar click on “Possible Duplicates” option

Edit Dictionary

Edit Dictionary

- User can add/edit/remove the values of dropdowns fields used in the cancer case form.

- Following “Edit dictionary” page will be opened

A screenshot of the 'Edit Dictionary' page. At the top, there's a light green header with the text 'Add/Edit Form Drop-down values' and three sub-links: 'Add/Edit Districts', 'Add/Edit Talukas', and 'Add/Edit Village/City'. Below this is a white dropdown menu with the text '-- Select Dictionary that needs to be updated --'. Underneath the dropdown is a table with three columns: 'Code', 'Value', and 'Actions'. The table body is currently empty, showing only the header row. The entire page is framed by a light green border.
