Executive Summary

- The Odisha State Population Based Cancer Registry (OSPBCR) is an initiative of the Department of Health and Family Welfare, State Government of Odisha, India, that aims to systematically document the cancer burden of the whole state i.e., a population of 45 million people.
- With technical support from Tata Memorial Centre, Mumbai and National Institute for Science Education and Research, Jatni, Odisha, the OSPBCR is planned to be implemented 2026 onwards.
- Training workshops were planned for district health officials from all 30 districts of Odisha in two batches. The training of the first batch was conducted from 7th to 9th January 2026 for 16 districts. The second batch of 14 districts was trained from 12th to 14th January 2026.
- A total of **115 participants** attended these workshops, including 26 District Public Health Officers (DPHO) and Additional District Public Health Officers (ADPHO).
- Participants were trained in core concepts of cancer registration, case abstraction procedures and ICD-O-3 coding, use of the “Setu” web-based data management tool for cancer registration, and follow-up techniques.
- The Standard Operating Procedure of the PBCR was discussed in detail with the participants. The training also included practical demonstrations by the staff of Khordha PBCR.
- Pre- and Post-tests conducted indicated good understanding of registry-related concepts among the participants, and a readiness to participate in the registry’s activities.

1. Background and Objectives

To systematically document the cancer burden of the whole state, the state Government of Odisha plans to a state-wide PBCR for Odisha state. As of now, Khordha and Mayurbhanj PBCRs cover about 11.4% of Odisha's population. The plan is to represent the cancer burden of all thirty districts of Odisha state, i.e. to cover a population of about 45 million. This step is imperative for improving cancer control and encouraging cancer research in Odisha, and by extension, in India.

The Odisha State Population Based Cancer Registry (OSPBCR) shall be established and funded by the Department of Health and Family Welfare, State Government of Odisha, India, with technical support from Tata Memorial Centre, Mumbai and National Institute for Science Education and Research, Jatni, Odisha.

The objectives of the OSPBCR are:

- To develop cancer registration activities across all thirty districts of Odisha state.
- To systematically collect, store, analyse, interpret, and present cancer incidence and mortality in Odisha state.
- To provide accurate figures on cancer incidence and mortality for cancer control programme and health policy planning.
- To encourage cancer research in Odisha state, using cancer registry data on cancer burden.

The role of Centre for Cancer Epidemiology (CCE), ACTREC, Tata Memorial Centre, Mumbai, for this initiative includes training in cancer registration, provision of a standardized web-based data management tool, and continuous technical assistance to ensure smooth functioning of the Odisha State Population-Based Cancer Registry.

As per the meeting held on 9th December 2025 with officials from the OSPBCR, TMC, and NISER, it was decided to organize structured training workshops in batches on establishing a population-based cancer registry. These workshops were planned for District Hospital officials from all **30 districts of Odisha State** to build capacity in population-based cancer registration at the district level.

2. Training in cancer registration

Two training workshops were organized to train personnel from all 30 districts of Odisha State.

The first training workshop was conducted from **07th to 09th January 2026** for participants from **16 districts**, and the second training workshop was conducted from **12th to 14th January 2026** for participants from the remaining **14 districts**. A total of **115 participants** attended the training workshops. Table 1 lists the names of the districts for each workshop.

Detailed list of participants is enclosed as annexure 1.

3. Training sessions

Faculty members from **Tata Memorial Centre** as well as **PBCR Mayurbhanj and Khordha** and **NISER** were actively involved in delivering the training sessions. The workshops focused on the establishment and operationalization of a **Population-Based Cancer Registry (PBCR)**, with emphasis on both conceptual understanding and practical implementation. Participants were trained in the following areas:

- Core concepts of cancer registration
- Types of cancer registries and their differences
- Case abstraction procedures and **ICD-O-3 coding**
- Use of the “**Setu**” **web-based data management tool** for cancer registration
- Management and functioning of a cancer registry office
- Standard Operating Procedure of PBCR
- Strategies to overcome challenges faced during data collection
- Methods for collecting cancer mortality (death record) information
- Verbal Autopsy Techniques
- Collection of cancer case information through **telephone-based follow-up**

Detailed training agenda is enclosed as annexure 2. **Pre- and post-tests** were conducted during the training. The results indicated a good understanding of registry-related concepts among the participants. To enhance practical exposure, a visit to the **PBCR Khordha office** was organized for participants to understand registry operations, office infrastructure, and data management processes. Participants expressed confidence in establishing the registry and carrying out registry operations effectively at their respective districts. The training concluded with **certificate distribution** to all participants and addresses from following dignitaries:

- **Dr. Deepak Routray**, Director of Acharya Harihar Post Graduate Institute of Cancer, Cuttack
- **Dr. Susanta Swain**, Additional Director NCD cum State Nodal Officer, Cancer Care, Department of Health and Family Welfare, Government of Odisha,
- **Prof. A. Srinivasan**, Professor, Dean of Faculty Affairs, NISER
- **Prof. Bedangadas Mohanty**, Senior Professor, Head of Centre for Medical and Radiation Physics, NISER

Dr. Susanta Swain addressed the participants and clearly outlined the registry background, objectives, stakeholder roles, and the future plan of action.
